

Carlos Rahino

C/C++ Programmer

Software Engineer, 16 years of experience within the IT Industry working as programmer, tester and Project Leader. Highly skilled in C/C++ but all around guy when the situation requires to (python, nodejs, MySQL, c#, Java, Webservices, PHP, CSS, signalling protocols, embedded software... and a long list after so many years !!!!). Always learning, in this world you can never stop learning, reading, tasting and also exasperating... (it is part of the task) Programming fan, pragmatic and methodical... XP (Extreme Programming) follower. Software quality and client satisfaction are my first two goals (money is the third, of course :-)). Software is my work, my hobby and my life!!
