Evgenii Ruis
Lead C# fullstack developer

Hello. From early 200x I develop wide range of commercial products including desktop application, large scale enterprise applications and web sites. Starting with C++ and WinApi now I developing on C# and .Net. I'm highly focused on application performance, usability, maintainability, portability, and scalability. I strictly follow the Object Oriented Programming paradigm and use Design Patterns, where appropriate. Also I'm experienced in database design/implementation and use all means necessary to achieve maximal data consistency, integrity and availability. 1st place in SQL and top 10% in C# Upwork tests. Web Development: HTML 5 JavaScript ASP.NET MVC ASP.NET Core Angular Razor Desktop Development: WPF XAML Winforms Telerik Controls Data Base: Entity Framework NHibernate SQL Microsoft SQL Server Oracle PostgreSQL MySql
